

Shaping the Future of Global Sourcing

The old IT axiom was:

“You can do it right, you can do it fast, you can do it cheap. Pick two.”

Now, with **E5 Systems**, all three are yours.

Who We Are

E5 Systems is a US-based IT Offshore Application Development and Maintenance Solutions company, delivering cost savings that significantly enhance the value of our clients' IT investments using proven leadership, rigorous process management, best-of-breed tools, a US based culture, a development center in China and seamless application of global talent.

Our Corporate Values

E5 Systems is committed to our clients' success, is proud to view client relationships as partnerships and as an extension of our clients' team. We conduct ourselves with the highest level of honesty and integrity while delivering solutions that provide real value.

Our Unique Approach

E5 Systems is the value leader in the IT applications services industry. Our skilled technical resources utilize the industry's best-of breed tools, a CMMI Level 3 certified rigorous methodology, and structured processes and procedures. Combining these strengths with **E5 Systems** technical and business experience and with the advantage of a combined American and Chinese leveraged culture provides the most effective IT results in the industry.

Our Distinct Advantage

E5 Systems' IT Strategic Consulting and Application Portfolio Management Service delivers a Technology Roadmap, providing IT Management clear and concise improvement options, impact assessments, and plans.

E5 Systems' Application Development and Maintenance Services enables our clients to reduce staff costs and/or redeploy resources to more strategically critical IT initiatives with project cost savings

E5 Systems blended onsite and offshore delivery capabilities incorporate these IT major success factors: Governance, Project Management, Communications, Methodology, and Delivery Assurance.

Our Application Services Offerings

E5 Systems focuses on delivering significant value to our clients in the following ways:

Portfolio Management

E5 Systems' specialists analyze our clients' software application portfolio, processes and infrastructure to deliver an application roadmap with plans and action items detailing enhancement, transformation or migration options.

Application Development

Companies cannot reduce costs using the same processes and procedures found in a traditional IT model. **E5 Systems** provides the experience, technology and resources with pricing advantages designed to allow our clients to achieve additional technical goals within their existing IT budget. We address complex technical requirements that enable our clients to migrate to new technologies and architectures that better meet their business growth needs in the most cost-effective way possible.

Application Maintenance

E5 Systems utilizes CMM3 RUP-based Advanced Application Maintenance Methodology (AAMM) to deliver an improved level of support with increased effectiveness at a substantially lower cost allowing our customers to redeploy valuable resources (people and funds)

Quality Assurance / Testing Factory

E5 Systems' technical resources are experts in Quality Assurance design, implementation and execution processes. Our sophisticated Testing Factory ensures the developed software meets or exceeds our clients' customers' quality imperative.
